Chapter 1

C++ Project Structure

TODO:

- [] Write a simple test
- [] Add test to Makefile

The Makefile will make the following folder structure:

- **bin**: for output executables (targets), both for the app and for any spikes and tests.
- **build**: for object/binary files created during compilation (this is removed by `make clean`).
- **doc**: for notes, configuration files and documentation.
- **include**: for the applications header files.
- **lib**: for any libraries that is compiled by the project.
- **resources**: for data files used by the executable.
- **scripts**: for scripts that can benefit the project (e.g. Python or bash scripts).
- **spike**: for smaller classes or files to test technologies or ideas.
- **src**: for the applications source files.
- **tests**: for all test code files.

1.0.0.1 Makefile commands

The following commands can be used with this Makefile:

- `make`
- `make all`
- `make build`
- `make clean`
- `make debug`
- `make release`

Chapter 2

File Index

2.1 File List

Here is a list of all files with brief descriptions:

include/ dRoll.h	5
include/ mainRoll.h	6
src/ dRoll.cpp	6
src/ main.cpp	7
src/ mainRoll.cpp	8

Chapter 3

File Documentation

3.1 include/dRoll.h File Reference

This graph shows which files directly or indirectly include this file:

Functions

- int **dRoll** (int k, int n, int b=0)
- int **dRoll** (int n)

3.1.1 Function Documentation

3.1.1.1 dRoll() [1/2]

```
int dRoll (  
    int k,  
    int n,  
    int b = 0 )
```

3.1.1.2 dRoll() [2/2]

```
int dRoll (  
    int n )
```

3.2 include/mainRoll.h File Reference

This graph shows which files directly or indirectly include this file:

Functions

- int `mainRoll` (int argc, char *argv[])

3.2.1 Function Documentation

3.2.1.1 mainRoll()

```
int mainRoll (  
    int argc,  
    char * argv[ ] )
```

3.3 README.md File Reference

3.4 src/dRoll.cpp File Reference

```
#include <cstdio>  
#include <stdlib.h>  
#include <vector>  
#include <time.h>  
Include dependency graph for dRoll.cpp:
```

Functions

- int [dRoll](#) (int k, int n, int b=0)
- int [dRoll](#) (int n)

3.4.1 Function Documentation

3.4.1.1 dRoll() [1/2]

```
int dRoll (  
    int k,  
    int n,  
    int b = 0 )
```

3.4.1.2 dRoll() [2/2]

```
int dRoll (  
    int n )
```

3.5 src/main.cpp File Reference

```
#include "mainRoll.h"
```

Include dependency graph for main.cpp:

Functions

- int [main](#) (int argc, char *argv[])

3.5.1 Function Documentation

3.5.1.1 main()

```
int main (  
    int argc,  
    char * argv[] )
```

MAIN function

Parameters

<i>argument</i>	list
-----------------	------

3.6 src/mainRoll.cpp File Reference

```
#include <iostream>
#include <string>
#include "dRoll.h"
#include "mainRoll.h"
```

Include dependency graph for mainRoll.cpp:

Functions

- int `mainRoll` (int argc, char *argv[])

3.6.1 Function Documentation

3.6.1.1 mainRoll()

```
int mainRoll (
    int argc,
    char * argv[] )
```
